143 Liberty St. N.Y.

L.F. Seaman, Esq. Secy.

Dear Sir,--

On my return, I find yours of July 11th. I shall be at home, Wednesday, Thursday and probably Friday of this week. I am usually absent Saturday and Monday of each week. My day in New York is usually Wednesday, but during the hot weather, I am there as little as possible.

Do we understand that you have authority from Mr. Herman Kretz, Supt. of the Mint at Philadelphia to make blanks for one and five cent coins from a different mixture than contained in the regular legally coined five and one cent minor coin blanks? Before making any such blank, we should have to have full authority along this line from Supt. Kretz or Director of the Mint. If you merely wish our opinion as to the utility of the metal for this purpose, that is another question, but we should need to have authority from the Department before making blanks of any different mixture or material than that prescribed by law for the one and five cent minor coins.

Yours truly,

Scovill Mfg. Co.
